Art Unit 1102

The following is an Examiner's Statement of Reasons for Allowance: The references cited by the examiner fail to teach the key features of the invention which is the space between the cover and the electrodes of the biosensor. The references also fail to teach that the reaction layer is tightly adhered to the electrode surface. This tightly adhered reaction layer allows the sample solution to be smoothly introduced into the space without generation of air bubbles whereby the response of the sensor is minimally affected, and the accuracy of the sensor is highly accurate.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to B. Bell whose telephone number is (703) 308-2527.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0661.
